---

Dear Hiring Manager,

I am excited to apply for the Frontend Web Developer - HTML, CSS (Remote) position at Aseel. I am a Computer Science student and frontend developer with a strong foundation in modern web technologies and a passion for building responsive, accessible, and user-friendly web applications. Aseel's mission of using technology to address complex challenges and create positive impact strongly interests me, and I would be excited to contribute my skills to your team.

My technical skills include HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Bootstrap, Node.js, Express.js, PostgreSQL, Prisma, Git, and Docker. I have experience building responsive web applications using mobile-first design principles, semantic HTML, maintainable CSS, and modern frontend development practices. I focus on creating clean, scalable interfaces that work consistently across different devices and browsers. Through my projects and professional experience, I have developed responsive interfaces from UI designs, translated designs from Figma into functional web pages, debugged frontend issues using browser developer tools, and worked with modern development workflows. I enjoy paying attention to details while also keeping the overall user experience, accessibility, performance, and maintainability in mind.

I am particularly interested in Aseel because of its combination of technology, innovation, and international development. I would be motivated to work with a diverse, remote team and contribute to products that have a meaningful impact on individuals and communities. I am also eager to continue expanding my technical skills and take on new areas of responsibility as needed.

Thank you for considering my application. I would welcome the opportunity to discuss how my frontend development skills, willingness to learn, and passion for technology could contribute to Aseel's mission. I look forward to hearing from you.

Sincerely,  
Mahfoza Sultani

February 18 2024– May 26 2024

## Work Experience

### Booky (Canada-based company)

Frontend Developer (Remote) Jan 2 2025– Jun 30 2025

- Assisted in designing and developing responsive user interfaces using HTML, CSS, and JavaScript to enhance user experience across Booky's web platforms.
- Built dynamic, data-driven forms by integrating frontend interfaces with backend APIs using JSON-based configurations.
- Utilized version control tools like Git and Bitbucket for collaborative development and efficient workflow management
- Collaborated in an Agile development environment, maintaining clear and organized project documentation using Confluence.

### Islamic Bank Of Afghanistan

Full-Stack Developer (Intern) NOV 4 2025– FEB 02 2026

- Developed full-stack web applications using Next.js and React.
- Built responsive user interfaces with Tailwind CSS.
- Designed and integrated backend services with MongoDB and PostgreSQL.
- Used Git & GitHub for version control and team collaboration.
- Containerized applications using Docker for consistent development and deployment.
- Participated in building internal banking applications from scratch.
- Collaborated with team members to implement features, fix bugs, and improve performance.
- Gained hands-on experience in real-world banking systems and full software development lifecycle.

### Silicon Team

Backend-Developer (Intern) FEB 05 2026– AUG05 2026

- Collaborated with the Silicon team on backend development projects.
- Developed and maintained backend services using Next.js.
- Designed and managed databases with Prisma and PostgreSQL.
- Integrated authentication and user management using Clerk.
- Built and maintained RESTful APIs.
- Followed Agile methodology throughout the development lifecycle.
- Participated in daily stand-up meetings and sprint planning sessions.
- Contributed to code reviews to ensure code quality and best practices
- Worked on the multi tenant Ecommerce website (Badam platform).
